Case Study 8: Online Food Ordering Website

Information

The Online Food Ordering Website helps customers explore a restaurant menu and choose food items conveniently. It presents restaurant details, menu categories, dish photographs, prices, special offers, and customer reviews in one place. Each dish is displayed in a clear product card with a short description and an order button. The page also includes a restaurant summary, menu category links, a promotional offer, and a customer review section. This layout makes it easier for users to compare meals and find the information they need.

Important Features

- Restaurant name, location, opening hours, and customer rating.
- Menu categories such as pizza, burgers, Indian food, Chinese food, desserts, and drinks.
- Food images, dish descriptions, prices, and order buttons.
- Special offers and coupon information.
- Customer reviews and a contact section.
- Responsive card-based design with navigation links.

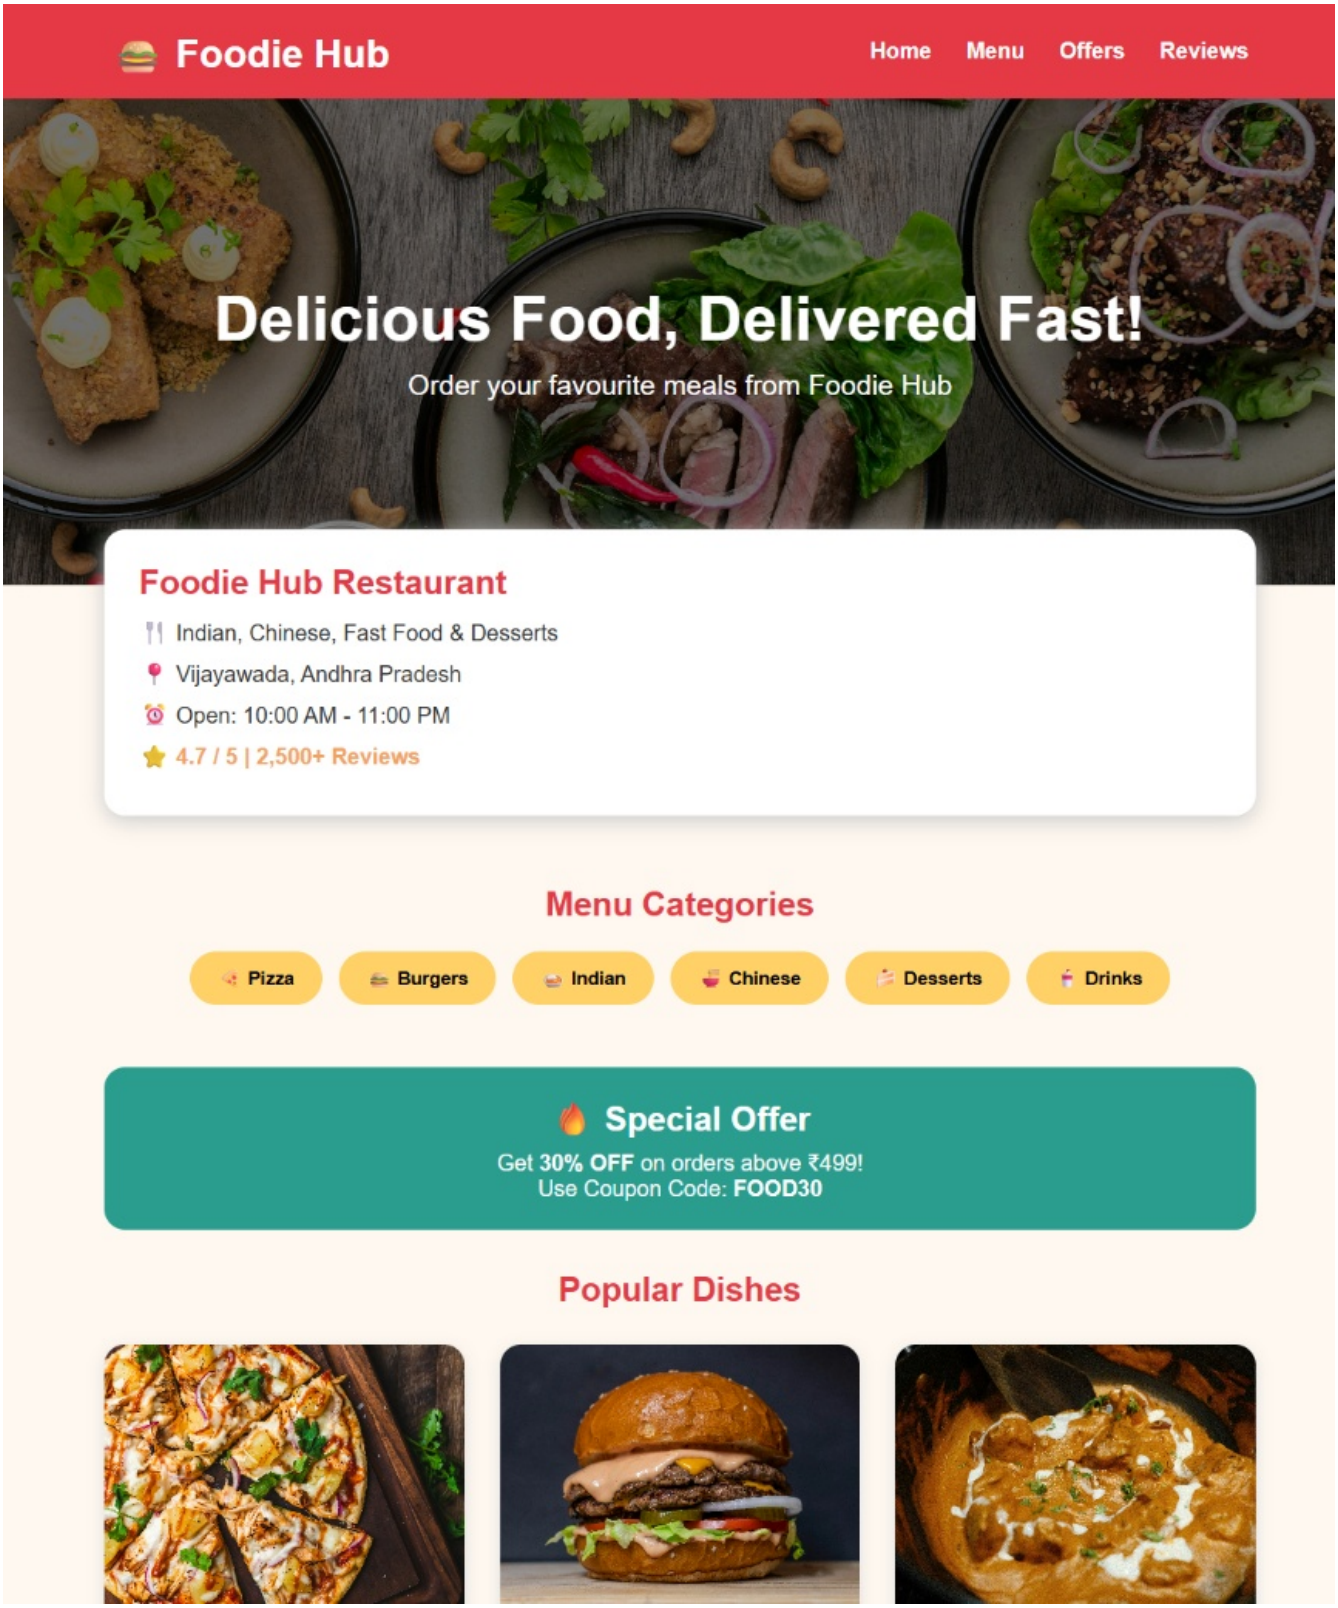

Technology Used

HTML for page structure and CSS for colours, spacing, cards, navigation, and layout.

Case Study 26: College Fest Management Website

Information

The College Fest Management Website provides a central place for students to learn about a college festival and register for activities. It presents technical events, cultural competitions, workshops, event dates and times, venues, coordinators, festival rules, and contact information. Students can review the event details before completing the registration form. Separate event categories and cards help visitors find suitable activities, while the schedule gives a quick overview of the festival.

Important Features

- Technical events, cultural competitions, and special workshops.
- Event descriptions, dates, times, venues, and prize details.
- Festival schedule displayed in a table.
- Coordinator contact information and festival rules.
- Registration form with student details and event selection.
- Navigation menu and contact section for visitors.

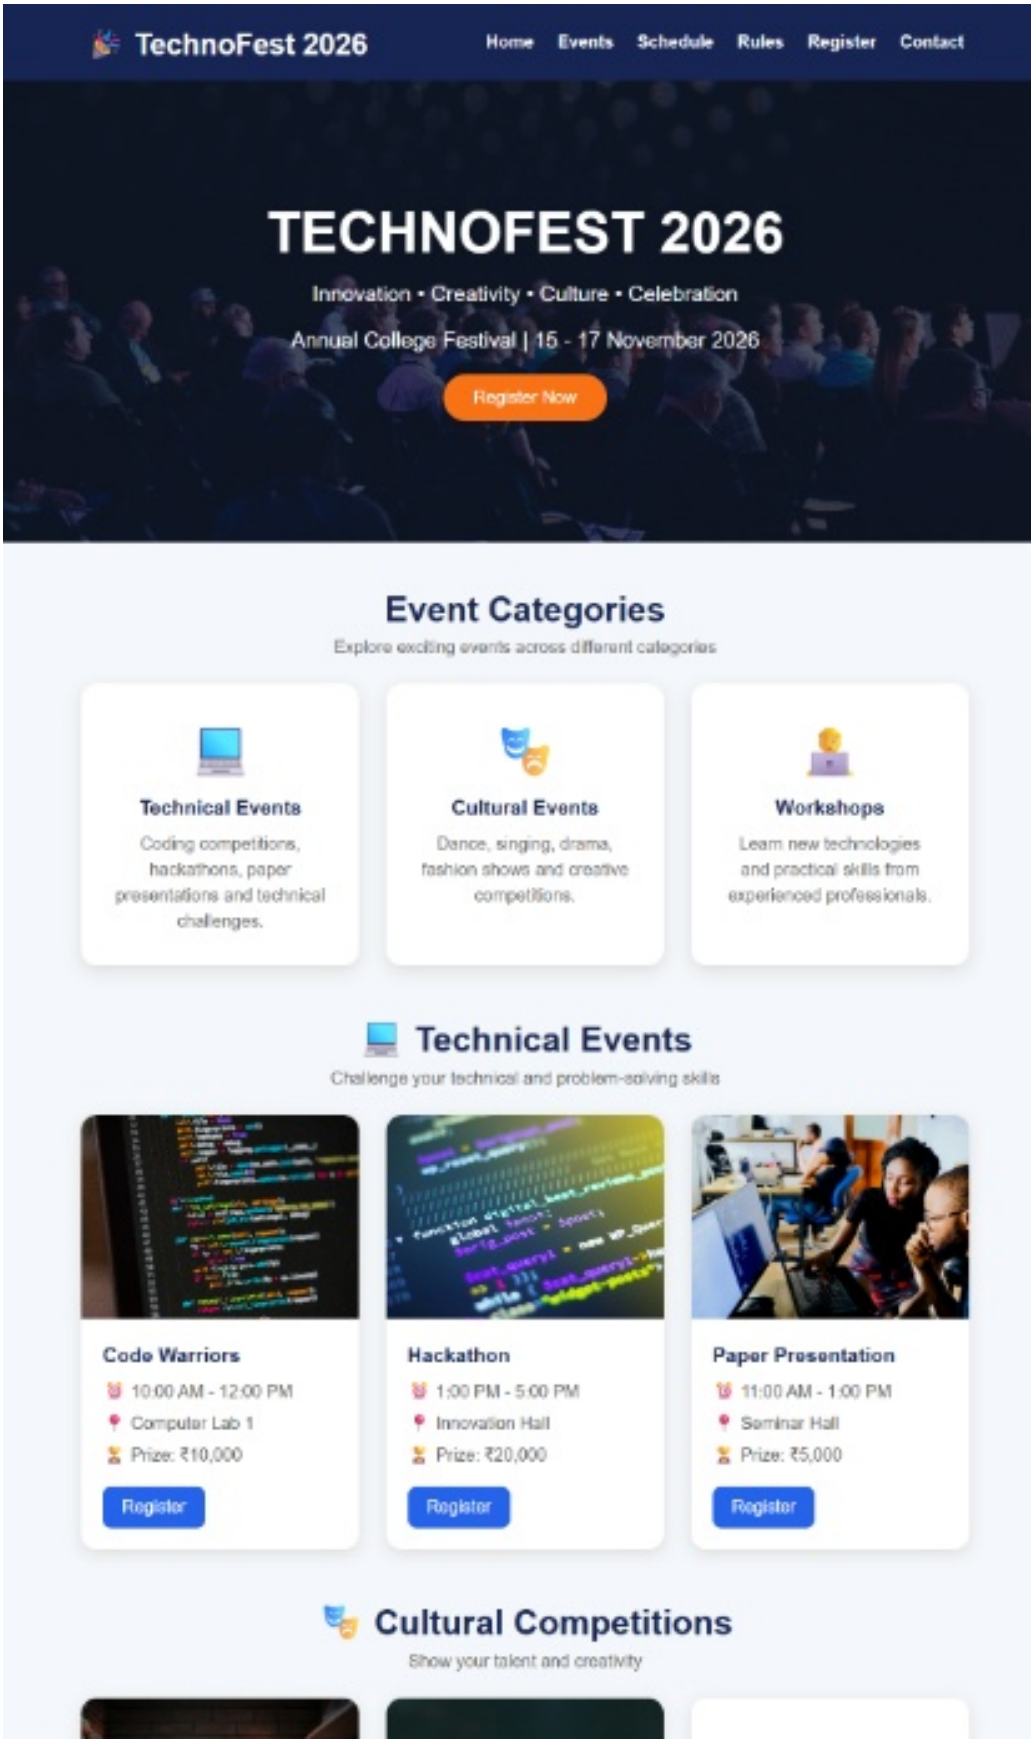

Technology Used

HTML for headings, cards, tables, and forms; CSS for page layout, colours, and visual styling.

Case Study 9: Bakery And Cakes Website

Information

The Bakery And Cakes Website introduces bakery products and helps customers explore cakes, pastries, cookies, and custom cake designs. Product cards display photographs, short descriptions, and sample prices. A seasonal offers section highlights discounts, while the custom cake section presents ideas for birthdays and other special occasions. A gallery showcases the products, and the contact section provides the store address, phone number, email, and opening hours.

Important Features

- Cake, pastry, cookie, and celebration cake categories.
- Product photographs, descriptions, and sample prices.
- Seasonal offers and discount promotions.
- Custom cake design examples for birthdays and occasions.
- Bakery image gallery and clickable navigation links.
- Store location, contact details, and opening hours.

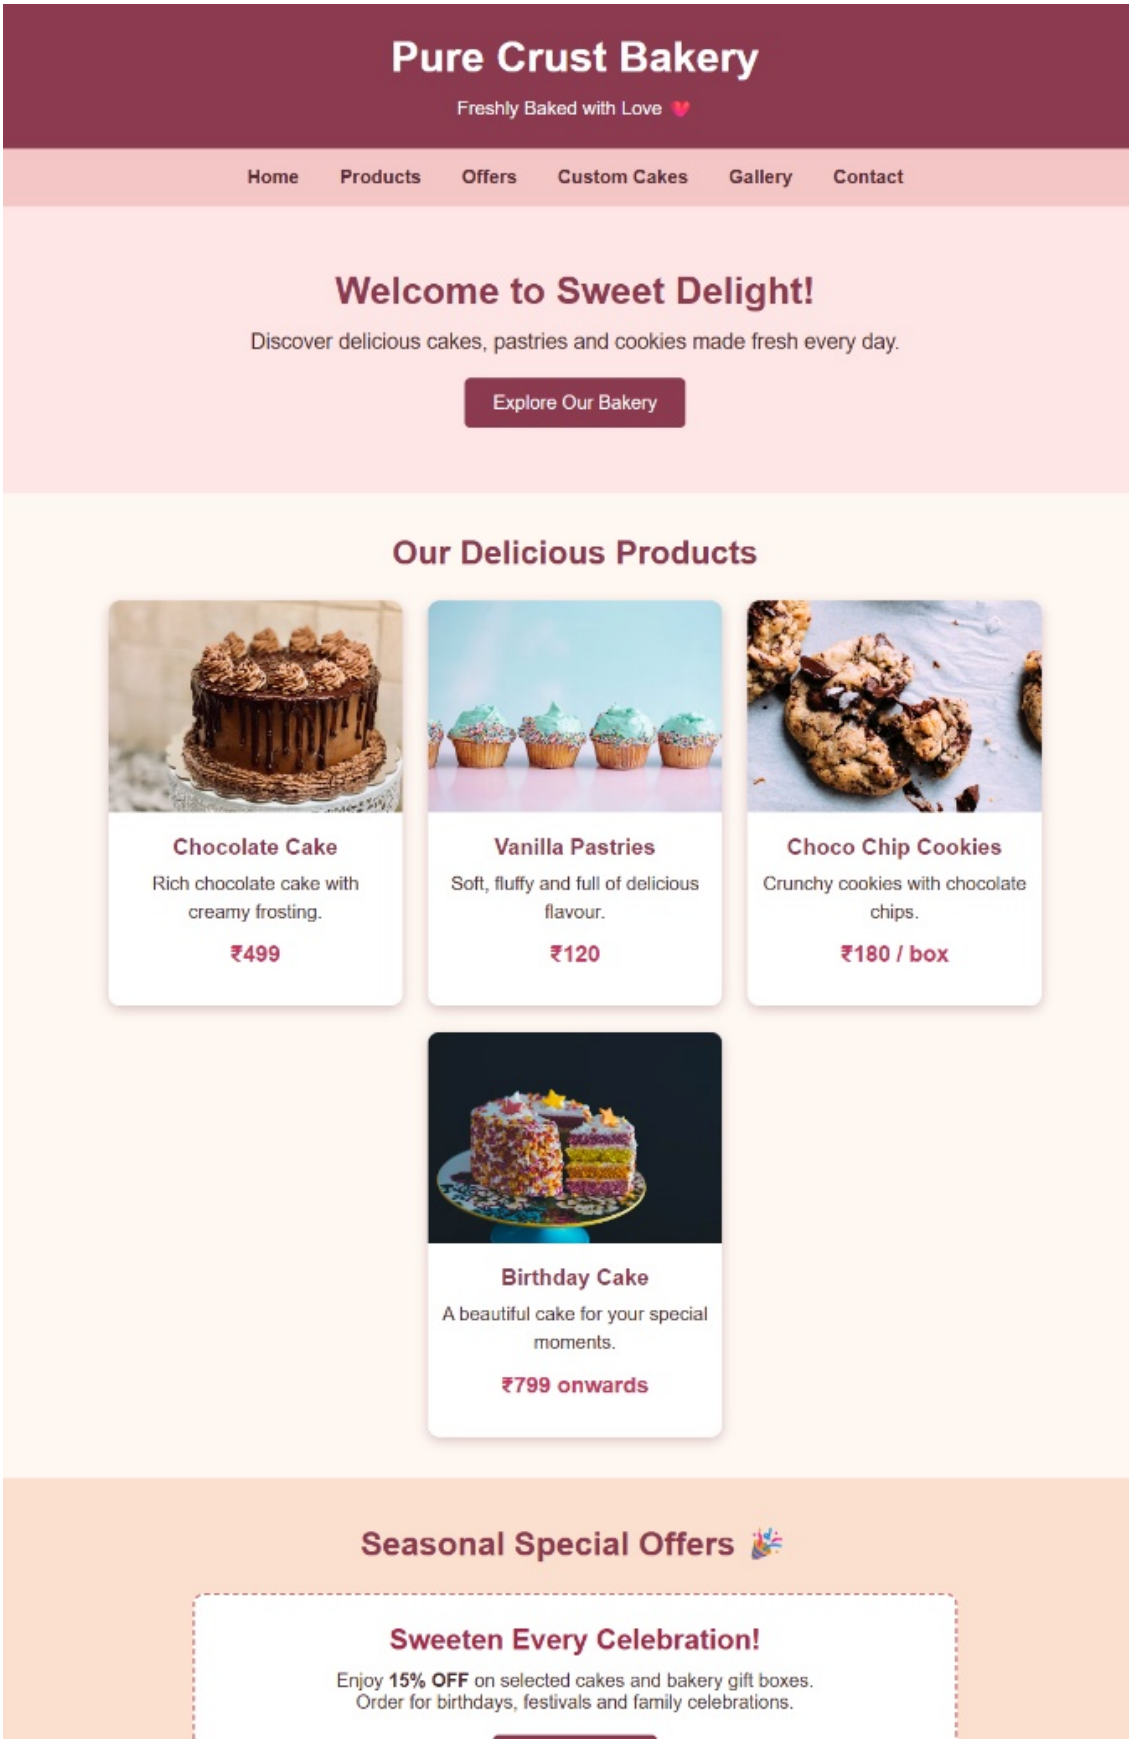

Technology Used

HTML for content and sections; CSS for the pink and cream colour scheme, product cards, gallery, and responsive layout.
